White Paper

Updated August 15, 2021

Changes in brief

We are continuously iterating on the platform based on feedback from the pavecoin community. As a result, we have implemented the following improvement.

- New Smart Contract ID: 0x87f76cda81d65d4b0983965725f598905cbca98d

- Updated timeline.

Abstract

The pavecoin objective is to bring the best blockchain initiatives to the global stage as quickly as possible. We only promote a project that has fantastic teams. Over 150,000 holders will be part of the Pavecoin Community, which will connect to a network of 1 billion people seeking a piece of the next crypto tsunami.

Picking a blockchain winner is akin to rocket science; it's difficult and time-consuming. Pavecoin facilitates this process by assessing projects with our community of blockchain and management experts. We pinpoint the solution's strengths, as well as its implementation flaws, and work to close the gap.

We are issuing 10,000,000 Million $PVN on a BEP20 on the Binance Smart Chain. 70% of the $PVN Issued will be allocated to the community.

Table of Contents

1.1 Introduction

The role of social media in the cryptocurrency space cannot be ignored. Bitcoin creator Satoshi Nakamoto first introduced the cryptocurrency to the world via a mailing list. The first Bitcoin transaction (10,000 BTC for 2 pizzas) happened via Bitcoin Talk in 2010. In its early days, the crypto space received little coverage from mainstream media. However, social media, chatrooms, and forums became the megaphone for the market. Social media is the driving influence in the crypto space.

In December 2013, Dogecoin was designed and introduced as a joke coin. Within the first 30 days, the meme coin received over a million visitors to Dogecoin.com, despite its sarcastic character. Dogecoin's success can be linked to the cryptocurrency's devoted community, often known as the Doge army, as well as backing from Elon Musk, a very influential engineer and Tesla CEO who can raise Dogecoin's price with only a tweet. Snoop Dogg, Gene Simmons, and Mark Cuban are among the Dogecoin supporters, in addition to Musk.

1.2 The Problem

Most crypto and blockchain projects, unfortunately, do not have the same level of visibility as Dogecoin. More than 2,000 cryptocurrencies have failed, according to Coinopsy, a firm that records deceased crypto projects. Some of these now-defunct projects have been documented as failures. Some of them were obvious rip-offs from the start. Others buckled under the weight of their expansion, and some of them abandoned their basic objective.

The reasons for these failures are based on the following frequent themes:

- a lack of funds
- Inability to acquire public trust.
- The idea was poorly executed.
- Lack of exposure to market
- No liquidity options for the community.

1.3 The Solution

Accelerate community vetted blockchain projects onto the global stage by creating a community of 150,000+ holders to generate viral exposure. Reward the community with returns on the increasing value of the community's liquid token, $PVN

The Community

✓ ROI and liquidity selling $PVN on crypto exchanges

✓ Investors support buying $PVN tokens

✓ Influencers build awareness for the project

Ongoing leadership so every project is a success

The Platform

✓ New project submitted

✓ Vetted by Pavecoin

✓ Posted to the marketplace

1.3.1 The Platform

From a technical "stack" perspective pavecoin uses best-in-class practices for software, security, and user experience. This does not make us unique. The advantage of the pavecoin platform is the strategy behind the mobile wallet. The design of the dashboard follows familiar material design principles. Easy navigation on the left panel for the addition of future modules such as the Project Market Place. A pavecoin mobile wallet is required to purchase, store and transfer $PVN token.

We currently support one pair, PVN/USDT, using Probit, the most secure, well-known, and well-respected exchanger.

The pavecoin platform is constantly evolving in response to user input and our product plan. This isn't a "wait and see" project. We're developing and delivering features

1.3.1.1 Addressing the lack of funds

The goal of pavecoin is to raise funds to continue developing a decentralized exchange for amazing blockchain projects. To issue "tokens" tethered to an acceptable form of value, the startup uses exchanger Probit. This could be in the form of a fiat currency or a widely used cryptocurrency.

1.3.1.2 Addressing the Inability to acquire public trust.

When proposals are submitted, proprietary algorithms rank them to be reviewed by an analyst. Rejected proposals are subjected to a second manual evaluation to identify edge cases and change the algorithm so that we don't miss out on a good opportunity. Analysts examine the prioritized initiatives by following up on evidence to "vet" them for further consideration by the board (Community pavecoin Committee). This procedure is essential for sustaining public confidence. Individuals that have excelled in many facets of successful blockchain initiatives make up the Community pavecoin Committee. They are appointed for 2.5 years, with one year overlap with the previous committee.

pavecoin Launchpad. Some of the factors considered in the vetting process include:

- A doxed team.
- A competent team.
- A passionate team.
- An exciting project with a real use case.
- A project that can ultimately lead to more people being interested in blockchain technology.
- A project with known corporate partners (optionally).

### 1.3.1.3 Addressing the issue of poorly executed.

In the fast-paced world of blockchain, even outstanding ideas that pass all of the initial checkpoints will need to iterate and pivot. A Business Analyst is assigned to each project to keep the community informed about progress and milestones. When needed, the community will provide coaching and resources to assist a project's portfolio success.

1.3.2 The Community

The community is the accelerant for the pavecoin platform. Success breeds more success and viral loops will rocket great blockchain projects to global success.

1.3.2.1 Addressing the Lack of Exposure

The power of the community to provide viral awareness for exceptional initiatives is the key value proposition of pavecoin.

Diagram of a Viral Loop

Referral becomes and holder

holders recruited

Receives a unique URL for tracking referral sign-ups

Shares with their fans and followers

Receives $PVN for achieving milestones

Liquidity event

A "pavecoin" achieves milestones by promoting the pavecoin Community through its unique link. When a new user joins using the link, the referring pavecoin wallet is compensated. Every recommendation contributes to the achievement of a new goal. An affiliate marketing program is built on this foundation.

Members and members who become investors are the two forms of referrals. Investor referral milestones will be rewarded with genuine $PVNs. Every referral has the potential to qualify for additional freebies and special offers.

Attracting Top-Tierholders as pavecoin

The value of trust must percolate up from the holders who encourage us to be successful in developing a "trusted" platform. A pavecoin is a reliable information source, not a harmful actor with their own goal. The Community will have a method in place to "vet" holders, similar to how projects do. Abuse of the community's "spirit" will result in expulsion.

Pavecoin will be used in a variety of fields, including crypto, social good, finance, and technology. They will comprise thought leaders and reliable information curators. As different as the intended audience, the platforms will be. Substack, Reddit, Twitter, Facebook, Instagram, Quora, LinkedIn, YouTube, Blogs, and many others are among the channels covered.

1.3.2.2 Addressing the Liquidity Issue

$PVN will be traded on popular crypto exchanges to address the issue of holder liquidity.

PancakeSwap   **coinbase**

B NANCE   **kraken**   **CEX·IO**

To participate in future projects on the Pavecoin platform investors will require $PVN. As more projects become available the demand for $PVN will increase. Exchangers will increase the value of $PVN relative to other popular token pairs. Since $PVN has a fixed supply this will further place upward pressure on the token's value.

Ultimately, the Pavecoin platform will find a balance between an appreciating token connected to well-capitalized liquidity pools.

1.4 Building a Community of 150,000+

Community building is a critical path of pavecoin. We are introducing an entry point for holders and affiliates to monetize their fans. Previously, the risk of a bad recommendation and damage to the holder's brand outweighed the benefits of being in the crypto game.
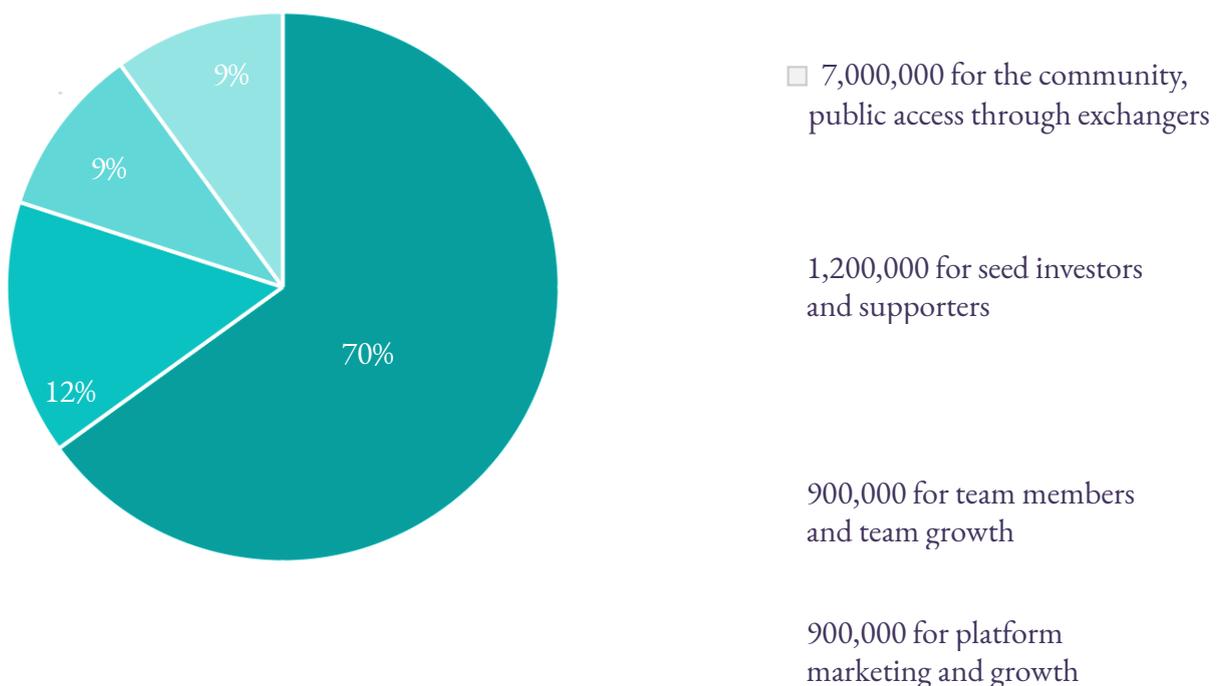

To achieve this, we will:

- Identify an agency partner with reach into holders, affiliates, and traditional media.
- Target holders and investors in technology, business, finance, and lifestyle.
- Execute a range of tactics that include:

Original content	Social Media	Press Release
SEO Optimization	Virtual and live events	Interviews

2.1 Tokenomics

Pavecoin is offering a BEP20 token based on the Binance Smart Chain. A total supply PVN of 10 million. The token supply will be distributed as follows:

☐ 7,000,000 for the community, public access through exchangers

1,200,000 for seed investors and supporters

900,000 for team members and team growth

900,000 for platform marketing and growth

The 70% genesis supply will be distributed to the listed exchangers.

The pavecoin team has worked on the platform for some time. The vesting schedule for team-member has been allocated in a manner that protects the interest of token holders and team members. The team members will be allocated 20% of the tokens due to them immediately. The remaining 80% will be locked in a smart contract and released periodically. Team members cannot sell more than 30% of their token holdings per year.

2.2 Use of Funds

Pavecoins' main objective behind the crowd sale is to attract 150,000 crypto holders and marketing geniuses by Q4 2021. The proceeds from the exchangers will be allocated as follows:
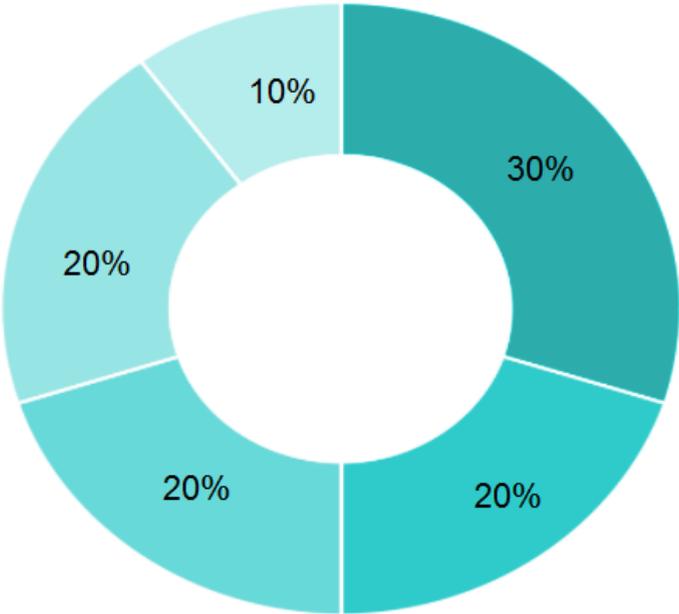

> ➤ 30% onboarding holders
> ➤ 20% expanding the team: hiring developers, writers, marketers, graphics artists.
> ➤ 20% market
> ➤ 20% liquidity
> ➤ 10% overhead

2.3 $PVN Token Model

$PVN is the native currency of an ecosystem that serves as a launchpad for other cryptocurrencies. The success of the project depends partly on the role played by the community as well as the team leading the project. The stakeholders responsible for the ecosystem are governed by a system that rewards good actors and penalizes bad actors.

The two main functions of $PVN are:

1. Trading. Token holders can buy and sell $PVN tokens on listed exchanges. Supply and demand for PVN tokens will determine its price valuation on the open markets.

2. Utility. $PVN token grants holders access to the platform and to engage in activities such as voting for projects and holders.

The growth of the platform will also depend on the trading volume and usage of the $PVN token. Each $PVN transaction contributes to the overall growth of the platform through a 10% tax fee where 4% is used to boost $PVN value, another 4% is distributed to token holders and the remaining 2% is reserved for marketing.

The $PVN smart contract is fully implemented by an experienced team of developers within the blockchain sector. The BEP-20 token is built on Binance Smart Chain. A special emphasis is placed on securing the smart contract to deter would-be-attackers. A regular smart contract audit will be carried out by an independent third party every quarter to detect loopholes and eliminate vulnerabilities.

Roadmap and Potential Developments

3.1 Roadmap

The roadmap outlines the planned direction and milestones for pavecoin from Q1 2021 to Q1 2022.

Quarter 1 2021

★ Building a team.
★ Developing the pavecoin idea.

Quarter 2 2021

★ Completing White Paper.

Quarter 3 2021

★ Probit exchanger listing
★ Marketing and promotion.
★ Launch the pavecoin Podcast.
★ Telegram Support and FAQs.
★ Develop pavecoin mobile wallet
★ Recruiting holders and projects.

Quarter 4 2021

★ More holder collaborations.

Quarter 1 2022

★ Go live with pavecoin mobile wallet
★ Continue to market and scale projects on the pavecoin platform.
★ Cross the 150,000 holder milestone.

3.2 Conclusion

Pavecoin is building a trusted community to kickstart vetted blockchain projects. The crypto market is still very young and has room for massive growth. Pavecoin success will be driven by the success of the projects it launches as well as the performance of its token - $PVN - on the exchangers.

Disclaimer: The purchase of $PVN tokens in the exchanger buy and sell does not constitute ownership in the company. The cryptocurrency market is highly volatile and tokens could be low or high in value.
